Summary

Data Engineer with hands-on experience designing scalable, cloud-native data platforms and production-grade ETL pipelines for enterprise environments. Strong foundation in SQL, data integration, and distributed data processing, with proven problem-solving ability and a consistent focus on improving data reliability, performance, and analytical readiness.

Certifications

Databricks Fundamentals • Machine Learning at Scale • Advanced Machine Learning Operations • Generative AI • Microsoft Fabric Training • Azure Data Engineer Associate (in progress)

Technical Skills

Big Data & ETL: PySpark, Apache Spark, Scala, Hadoop, dbt Core, Delta Lake, Delta Live Tables, Airflow

Cloud Platforms: Azure (Databricks, Data Factory, Synapse, ADLS Gen2, Azure SQL, Azure DevOps), GCP (BigQuery, Dataform, Dataproc)

Streaming: Kafka, Event Hub, Azure Functions, REST APIs, SFTP

Data Modeling & Quality: Medallion Architecture, Kimball Modeling, SCD Type 1/2, Data Quality Assertions, Lineage

Languages & Tools: Python, SQL, Git, GitHub, MLflow, Power BI, Looker

Experience

EZData Advisory IT Services and Consulting Pvt Ltd

Nov 2025 – Dec 2025

Data Engineer – Full Time, Uttar Pradesh, India

- Migrated legacy ADF pipelines to PySpark-based ETL frameworks on Incorta and BigQuery, enabling API-driven ingestion and eliminating manual pipeline maintenance by 100%.
- Built reusable Dataform SQLX models, functions, and dependency chains, reducing duplicate transformation logic by 40% and standardizing enterprise data modeling.
- Implemented data quality checks (uniqueness, not_null, referential integrity) and incremental load frameworks, reducing data issues reported by analytics teams by 35%.
- Delivered curated, analytics-ready datasets to BigQuery and integrated with Looker, improving dashboard query performance by 30%.

Data Master Consulting Pvt Ltd

Nov 2023 – Oct 2025

Data Engineer – Full Time, Maharashtra, India

- Designed and delivered batch and real-time ETL pipelines using Azure Data Factory, Databricks, DBT Cloud, Delta Live Tables, and Kafka, automating ingestion from SAP HANA, SFTP, APIs, and Microsoft 365 into ADLS Gen2 with 100% automation.
- Architected and optimized Medallion Architecture (Bronze–Silver–Gold) using partitioning, liquid clustering, and caching, improving query performance by 70% and supporting 500K+ daily transactions.
- Processed 100GB+ datasets using PySpark and Spark SQL (broadcast joins, predicate pushdown, caching), reducing compute costs by 30% and improving report refresh times.
- Developed SCD Type 1 and Type 2 pipelines and incremental Delta Live Tables, enabling near real-time analytics and audit traceability for pharmacy and retail clients.
- Implemented CI/CD pipelines using Azure DevOps YAML across Dev–QA–Prod environments, reducing deployment effort by 45% and improving release stability.
- Delivered Power BI dashboards and curated Gold-layer datasets, improving sales and financial insights by 40% and reducing executive reporting turnaround time by 25%.
- Automated pipeline monitoring and alerting using ADF triggers and ServiceNow, and implemented dbt freshness checks and tests to ensure SLA adherence.

Projects

Real-Time Movie Analytics ELT Platform (Netflix-Style Use Case)

GitHub

- Designed and implemented a scalable cloud-native ELT platform using Amazon S3, Snowflake, and dbt to process large-scale movie metadata, ratings, and user interaction datasets.
- Built raw, staging, and analytics-ready layers using dimensional models based on Kimball star schema principles to enable high-performance analytics.
- Implemented data quality tests, governance rules, and modular dbt transformations to deliver trusted, production-grade analytical datasets.

Real-Time Stock Market Data Pipeline

- Developed near real-time streaming ingestion pipelines using Azure Event Hub to process high-frequency stock market data.
- Implemented anomaly detection and automated alerting mechanisms, reducing analyst response time by 50%.
- Integrated streaming outputs with SQL Server and Microsoft Fabric to ensure analytics-ready reporting.

EDUCATION

Walchand Institute of Technology, Maharashtra

B.Tech in Electronics and Telecommunication Engineering

Jun 2019 – Jul 2023

Percentage: 80.2%
